
Conclusion of our workshop „Learning Network“ *Presentation of Ståle Tangestuen*

Base of discussion has been “Learning process in the CMCE-project”

Following you will find results of 2 workshops, based on the questionnaire of the handout:

Workshop 1:

What have we learned during the seminars?

- a lot of different marketing strategies
- different cultures, countries and systems of education
- different experiences of each participant
- how to integrate the usual “business (commercial) marketing” into the educational systems and also in non-profit systems

How have we learned?

- lectures from experts
- lectures from participants
- workshops
- discussions (informal learning)
- visiting the institutions
- learning methods (for example brainstorming)

Which method, regarding the learning outcome, has been the better one, presentation and workshops or lectures?

- preference was, having a theoretical lecture for the topic and afterwards it has been very efficient to discuss the inputs in a workshop or to process some tasks
- it was important to have the structure or the frame of the input

In what way does commitment influence the project on the learning process?

- Commitment of each participant triggers something.
- For the future workshops we compiled the following:
 - o To stay in touch with all participants regularly
 - o To collect topics for the next meeting, proposals from all members are appreciated
 - o To inform all members about the topics before the meeting starts
 - o To distribute tasks to all members for the next meeting, so they can prepare themselves and they are concerned about the topics
 - o To create a report (all participants) to guarantee a postprocessing

Workshop 2:

We worked a long the questions “What have we learned during the seminar” and “How have we learned”.

Thinking of we came all from different countries, with different values, experiences and how to handle the work in our schools or social – educational institutions, we share one spirit of being one group learning from each other. The main point is to treat each other in a way, you fell equal. There is no group or person who is standing above the other one.

Also we realised that the CMCE – project gives us the opportunity, to learn from our hand, heart and head, holistic learning we called that type of method. You understand things better if you be able to fell them or touch them, to let those things in your heart (emotional) and at least use the brain.

Besides learning from experiences, lecturing, seminar and workshops it is also very important that we learned in a kind of culture way. For example, in Auvillar, when we celebrated our last evening in the wine – yard, danced through the night. That’s also a kind of learning – experience witch belongs to our learning – process in the CMCE – project.

So we do learned a lot about different types of educations, advising, marketing strategies, but even more important is the way to learn from each other, to share culture moments, whether during dancing, singing, sitting together or going for sightseeing.

We hope this opportunity to meet each other will continue in the future!!
